

January 18 - 23

# National Awareness Career Week

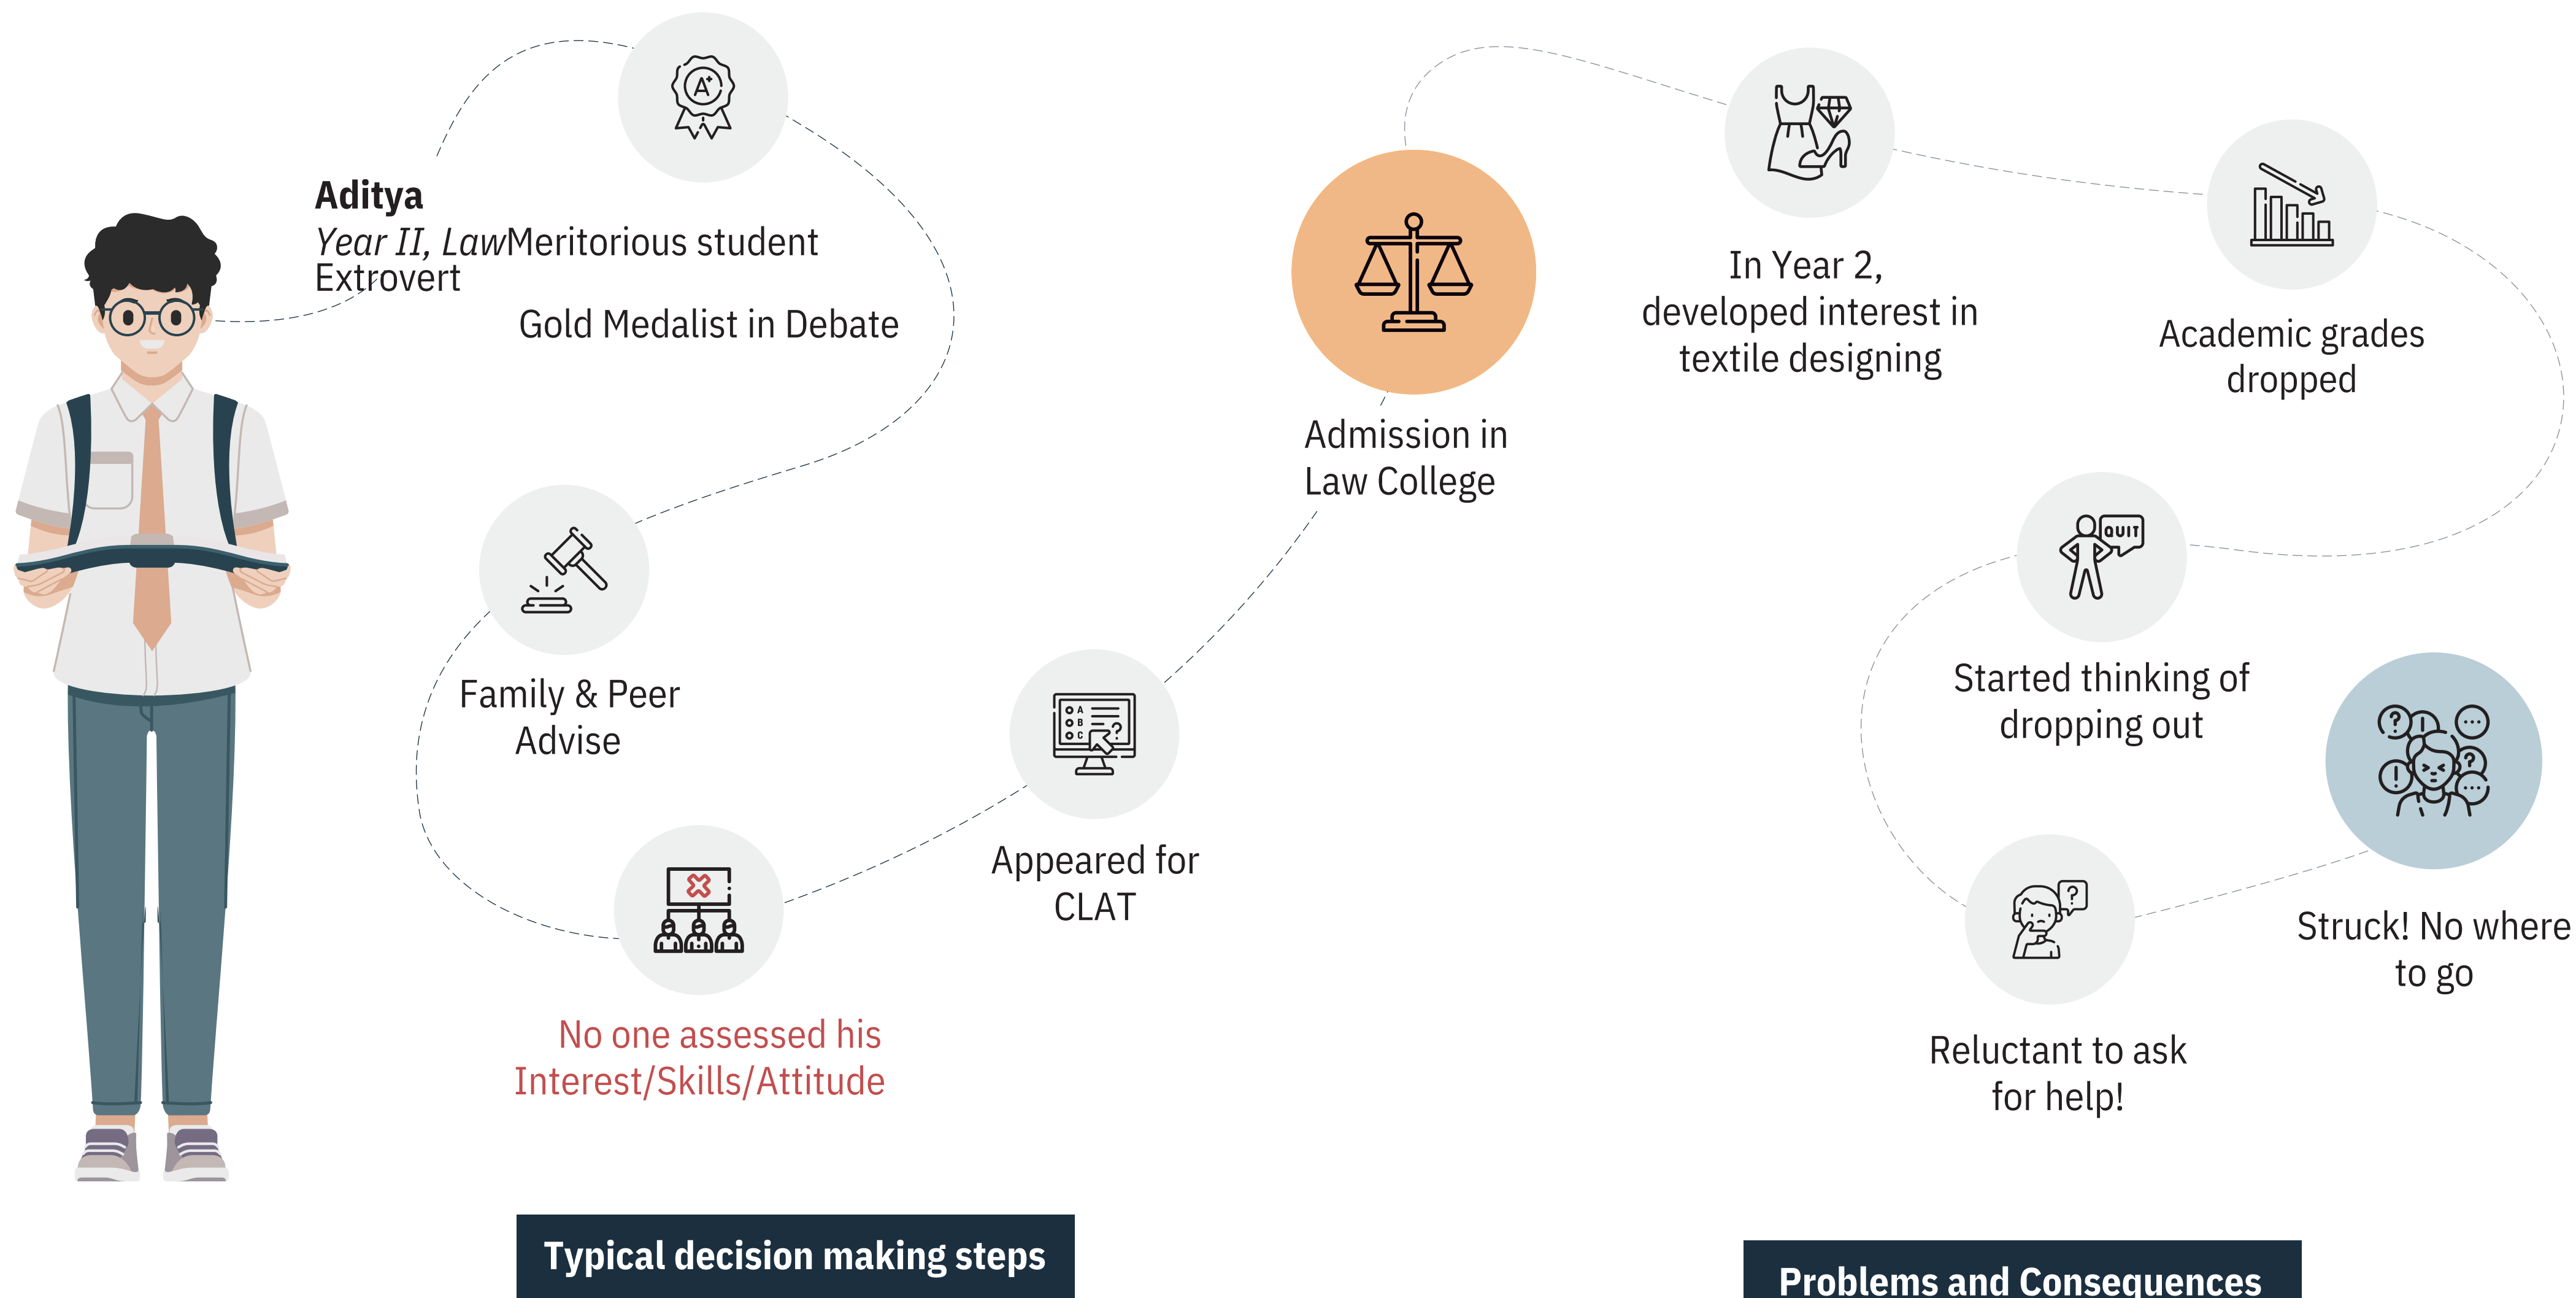

Making Informed Choices

Importance of information and advice grows as alternatives  
and choices within the education system increases.

Schools need to put more emphasis upon career guidance as they make pathways through education more flexible and more individualized.

Introducing

# National Career Awareness Week

01

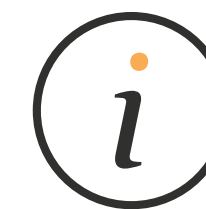

A week long event to help young learners to Explore, Engage, and Thrive in their chosen careers.

02

Interaction with professionals from industry and academia. It includes small group interaction with experienced career counselors to address the student questions

“

Discover Within has partnered with the National Program on Career Awareness (NPOCA) to build a career development ecosystem in Nepal. We share the same vision to integrate career education and guidance in the school curriculum so that children are prepared for their future career according to their strengths and potential from the school level. We are on a mission mode to impact 100+ schools and 20000+ students by 2025 in Nepal.
